

AKHIL A KUMAR

akhilajithkumar91@gmail.com | +919446087507 | Alappuzha,Kerala,India

[LeetCode](#) | [GitHub](#) | [Linkedin](#) | [Blog](#)

EDUCATION

Amrita Vishwa vidyapeetham

Artificial Intelligence M.Tech

Amritapuri

August 2024 - Present

College of Engineering Chengannur

B.Tech Electronics and Instrumentation

Kerala

August 2018 - June 2022

EXPERIENCE

HutLabs | Research Intern

Amritapuri,kollam | july/2025 - july/2026

- Conducting research on motion forecasting for autonomous systems, focusing on trajectory prediction using deep learning models.

Pantech.AI | Deep Learning Internship

Chennai,India | March 2024 - June 2024

Achievements/Tasks:

- Learned deep learning from scratch and strengthened concepts
- Implemented hand sign language detector using Computer vision

Spark Foundation | ML Internship

April 2024 - May 2024

Achievements/Tasks:

- Machine learning model to predict the marks a student can get according to their behaviour
- Linear Regression model was the used and had a good accuracy of 95%

AI Variant | Data science intern

Bengaluru,India | Jan 2023 - July 2023

Achievements/Tasks:

- Machine learning model to predict the amount of carbon dioxide (CO2) emissions produced by vehicles based on their specification
- Customer Segmentation - Clustering Machine learning model to group customer segments

SKILLS

Programming Languages: Python

Libraries/Frameworks: Tensorflow, Scikitlearn, Pandas

Tools / Platforms: VS Code, Git, Github

Databases: MYSQL

PROJECTS / OPEN-SOURCE

Movie Recommendation system | [Link](#)

Python,NLP

- created an end to end project built with NLP
Dataset was taken from kaggle. Cleaned and transformed the data
created a streamlit app to display the recommendations

Breast Cancer Prediction | [Link](#)

Python,Machine Learning,Streamlit

- Developed a machine learning model for breast cancer detection using medical datasets.
Implemented classification algorithms such as logistic regression and random forests to improve accuracy.
- Evaluated model effectiveness using metrics like accuracy, precision, and recall.
Collaborated with a team to analyze results and present key insights.

Car price Prediction | [Link](#)

Python, Machine Learning, Flask

- Created an End to End project built with Random Forest Algorithm, Dataset for this project was taken from carwale.com. Performed Data Cleaning, Hyper parameter tuning and achieved good accuracy. Created a Flask app to display the selling price of the car

Face Mask Detection using YOLOv11 | [Link](#)

Python,ultralytics

- Implemented a real-time face mask detection system leveraging YOLOv11 for object detection.
- Achieved high accuracy in classifying individuals with/without masks in real-world scenarios.

CERTIFICATIONS

- Data science Course - **Excel R Bengaluru**
- Machine Learning with Python - **IBM**
- Data Science Complete Course 2023 - **Udemy**

HONORS & AWARDS

- Secured a position among the top 15 teams in a national-level data science hackathon organized by Tredence.
